

Outpatient Programs

Primary mechanism by which to access supplemental Recovery Residence funds

Residential Programs

Every effort should be made to connect clients to an Outpatient Program to access Recovery Residence funds

- ✓ Client must be actively receiving Outpatient Treatment or Recovery Services under BHS SUD contract
- ✓ Up to 9 months maximum supplemental funding
- ✓ County funds a maximum of \$40/day or \$1,200/month (Months 1 through 3)
- ✓ County funds a maximum of \$20/day or \$600/month (Months 4 through 9)
- ✓ Maximum benefit is \$7,200/client
- ✓ Client must contribute a minimum of 30% of net (take home) monthly income, including state/federal benefits
- ✓ Client employment not required
- ✓ Contract allocation: Separate cost center with dedicated funding

Recovery Residence

Program's tracking of supplemental funding to include adherence to maximum time parameters, daily allocations, overall benefit per client as well as total spending of cost center/line item

Program's written procedure(s) outlines coordination of care & RR payment (no direct payment to clients)

Program's written procedure(s) to guide RR selection. Programs may utilize BHS RR oversight contract upon establishment

Supplemental funding coverage limits may be adjusted through COR authorization

No treatment groups in Recovery Residences

- ✓ Client must be actively receiving Recovery Services
- ✓ Client must be informed of expanded Recovery Residence benefits through Outpatient Programs
- ✓ Up to 6 months maximum supplemental funding
- ✓ County funds a maximum of \$20/day or \$600/month for up to 6 months
- ✓ Maximum benefit is \$3,600/client
- ✓ Client must be employed 40 hours/week
- ✓ Client must contribute a minimum of 30% of net (take home) monthly income, including state/federal benefits
- ✓ Contract allocation: Line item within primary cost center and funding

To obtain Recovery Residence through the Residential Program:

- ✓ Client does not meet ASAM criteria for Residential or Outpatient Services, or
- ✓ Client meets Outpatient service criteria but declines
