Title	**SmartCare – Update: CalMHSA Rx User Widgets**

Summary:

CalMHSA has released updates in CalMHSA Rx. This includes pushing data from CalMHSA Rx into new Active Medication and Allergy widgets, available ONLY to those who have access to CalMHSA Rx, and the Psych/Medical Note template which is used by medical staff for documentation.

The activation of these updates is taking place between Monday, March 17 and Tuesday, March 18. During that timeframe, these screens may be only partially populated and it will be best to view this data using existing workflows/other screens.

After Tuesday, March 18, changes entered into the CalMHSA Rx portal will be automatically pulled into SmartCare widgets/notes accordingly.

Timeline:

- **Monday, March 17:**
    - Active Medication Widget – Will appear in the system, populated with any existing SmartCare data.
    - Allergy Widget – Will appear in the system, populated with any existing SmartCare data.
    - Current Prescription process remains unchanged.
- **Tuesday, March 18:**
    - After data initialization, the interface will be activated, and the following screens will be populated with CalMHSA Rx (Dr. First) data:
        - Active Medication Widget
        - Allergy Widget
        - Psych/Medical Note History

Educational Materials:
